JOB REFERENCE LETTER

To Respected Sir/Mam

I am delighted to write this reference letter for Miss Payal Khah for the Job at Meditab Software India) Pvt. Lid. She had been my student for the past few years , i am assistant professor of Computer Science and Engineering at G H Patel college of engineering and technology and used to teach him subjects like Web Programming , Mobile application development , computer network.

Payal is a distinctive student in many ways. She has the knack of going to the crux of any problem and then she uses her research and developmental skills in order to come up with the best possible solution She has consistently shown strong desire towards learning. I always found her keen to work on research assignments, projects and seminars and devoted considerable time and effort towards it. She has developed strong base in Computer Engineering and topics related to the subjects. This, she has achieved by attending training and attending expert talks. It was due to such efforts that her class interactions and discussions were always welcomed by the professors and her peers.

Payal has consistently shown exemplary communication abilities, a keen intellect, and commendable social awareness throughout his undergraduate studies. In charge of group projects, she has exhibited incredible leadership and management abilities. I've also paid close attention to how she interacts with the faculty and staff at the college, and I value how collected be is in trying circumstances. Her determination is something I've also noticed, and given her youth and desire for excellence, its only natural. For junior and senior students alike, she will be a constant source of inspiration. Her desire will, in my opinion, propel her up the success ladder.

Her ability to quickly grasp new concepts and communicate effectively are noteworthy. She takes a methodical and systematic approach. She is capable of working both independently and in groups. Her knowledge of various subjects, as well as her mathematical skills, will beneficial for your company.

Sincerely,

Dr.Brijesh Patel
